

RANKING OF UNITS 2021

Criteria and Rules of Preparation

- 1) The ranking includes units employing in 2021 employees qualified as the N number at MUW.
- 2) The position in the ranking is described by "RESULT" i.e. the number of points of individual shares in the works published in 2021, attributable to a job position of the unit employee, qualified as the N number as per the status on 31 December 2021.

$$\text{Position in the ranking (RESULT) = } \frac{\text{Sum of points of individual shares of the unit employees in the works published in 2021}}{\text{Size of job positions of the unit employees qualified for the N number as per the status of 31.12.2021}}$$

- 3) The summary of points includes publications whose authors are the unit employees, which meet the evaluation criteria, introduced to the WUM.PUBLIKACJE system and published not later than by 10 January 2022. If the employment unit changes in 2021, the score attributable to a given employee is included entirely in the accomplishments of both employing units.
- 4) The basis for including the work in the summary is work affiliation at MUW and consent of the author to include this work in the MUW accomplishments.
- 5) Individual shares in the work are divided in equal parts into co-authors settling a given work at MUW, regardless of the declared scientific discipline. Only the authors of works with a score 100+, meeting jointly the 3 criteria, i.e. employment at different departments, different units and representing different leading disciplines shall receive 100 % of shares. The doctoral students of the Doctoral School are treated as employees of a separate unit.
- 6) The works are scored according to the current list of the Ministry of Higher Education and Science (MEiN). For works published in journals with scores not exceeding 40 points, a 0.5 coefficient which decreases its significance, is applied.
- 7) In the summary of units, evaluation restrictions, such as slot restrictions or restrictions regarding monographs and chapters in scientific monographs, are not applied.
- 8) Two rankings were prepared: ranking of units with employment of up to 3 job positions and ranking of units with employment exceeding 3 job positions.

Additional information included in the list.

- Share in the scores of projects approved for implementation in 2021 whose heads are MUW employees.
- Share in the scores of patents published in 2021, whose authors are MUW employees.
